

Measure 108a: Documentation of a Complete Family History

What does complete family history include?

For whom should family history be collected?

- All patients with a cancer diagnosis

Where can family history be documented?

- Oncologist's note
- Scanned documents or media tab
- EMR's family history tab
- Genetic counselor's note

What if a patient doesn't know their history?

- Document that all 1st and 2nd degree relatives were assessed and family history is unknown
- Document "age unknown" if patient doesn't know the age at diagnosis
