

MOQC NEWS

MICHIGAN ONCOLOGY QUALITY CONSORTIUM

FALL 2022

From the Program Director

Thanks to all who attended the Biannual Meeting. We had great participation—thank you all for your contributions. Please take a few moments to read through this newsletter whether or not you were able to make it to the meeting.

For this newsletter, I thought I'd share one of the themes that our team has been considering a great deal as we move forward to center equity. It is hard to ignore racial, ethnic, economic, and geographic differences in access to cancer care and quality of care across our country and worldwide. In addition, other groups, including immigrants, sexual and gender minoritized people, people with disabilities, and elderly people, all face unique challenges. Of course, we all have multiple identities, and people can belong to more than one group at risk for worse outcomes. The concept of intersectionality refers to the fact that people and communities may have membership in two or more groups that are historically granted less power. For example, someone with a disability who is from a racial minoritized group is at particular risk of worse cancer and other health outcomes. In addition, it is possible to belong to a group that holds power and to a group that is disempowered.

As we identify opportunities across the state to improve equity, we hope to be particularly aware of this concept of intersectionality and its implications for our patients and their families. Let us know if you have ideas to share about how best to serve the people with cancer in our state and stay tuned for more information on our equity initiatives. In addition, if you want to learn more about intersectionality, email me for a selection of articles and podcasts.

We are so grateful for your commitment to high quality and equitable care for everyone in Michigan.

Dr. Jennifer Griggs
Program Director

MOQC

Cancer care. Patients first.
The best care. Everywhere.

MOQCLink – Database Update

We are excited to announce that testing of our new database, MOQCLink, is complete! The database is now live and ready for data entry. For Round 2 2022, a limited set of clinical data abstractors have been entering data into MOQCLink from a small number of practices so that we can continue to verify that the abstraction process is correct. Once data is entered, we will begin to collaborate with Arbor Research (the vendor building and maintaining MOQCLink) regarding the reports and dashboards that we hope to make available to all practices starting in 2023. Remember that all data from all practices will be entered into MOQCLink, starting with Round 1 2023.

Practice Spotlight

The team at Marshfield Medical Center-Dickinson (MMC-D):

Dickinson Hematology Oncology (previously Dickinson Hematology Oncology Clinic) provides care for patients in Dickinson County and the surrounding areas of the central Upper Peninsula. Dickinson is the only MOQC practice in the central time zone. Wisconsin-based Marshfield Clinic Health System acquired Dickinson County Healthcare System in February 2022. This new relationship will allow the team at Dickinson to participate in research through the Marshfield Clinic Cancer Care & Research Center and ensure that patients can access clinical trials close to home.

Dickinson has some exciting changes coming in the next few years. MMC-D will undergo an EHR transition in 2023 to Cerner, allowing a more seamless experience for our patients during care transitions. The team at MMC-D is currently in the design phase of building a state-of-the-art cancer center, which will include an 8,400 SF addition on the main hospital campus. Highlights of the new cancer center include:

- Private infusion rooms
- Consult and conference areas
- A patient library
- A private entrance for patients seeing oncology providers

This new space will open for patients in 2024.

The MMC-D Hematology Oncology team continues to be led by Gustavo Morel, MD and Michelle Morel, PA. Both have provided cancer services to the Dickinson community for over 20 years. The care team expanded in August 2022, adding Emily Essendrup, NP.

MOQC Practice Awards

MOQC is pleased to present awards to practices and practice members who exemplify our core values:

The names listed here are individuals and practices about whom MOQC team members have shared stories celebrating those values.

Thank you for making a difference and for exemplifying what shows MOQC at our best.

For more information about Practice Awards, see the newsletter on the MOQC [website](#).

TRUST & INTEGRITY

Our reliability, transparency and openness build trust.

COLLABORATION

We make our best decisions as a group.

COMPASSION

Our deep respect and appreciation for others creates an environment for all to flourish.

GROWTH MINDSET

We are flexible – growing, innovating, and embracing new ideas.

Abstracts at ASCO Quality

The MOQC team had 4 abstracts accepted as poster presentations at the ASCO Quality meeting this fall –

“Palliative radiation therapy pathway for patients on hospice in a statewide quality improvement collaborative”

BY LEAD AUTHOR NATALIA SIMON

“Increasing Tobacco Cessation Counseling & Referral in a Statewide Oncology Collaborative”

BY LEAD AUTHOR MARIEM RUIZ MARTÍNEZ

“Clinical and nonclinical factors associated with a complete family history in a statewide quality improvement consortium”

BY LEAD AUTHOR SHAYNA WEINER

“Characterization of an embedded clinical oncology pharmacy model across the State of Michigan”

BY LEAD AUTHOR EMILY MACKLER

The meeting was September 30-October 1, and there was good engagement with our presentations. Please reach out to moqc@moqc.org if you'd like to see or learn more about any of the posters.

Abstraction Fun Facts

- MOQC Abstractors have at least 60 different logins and passwords to abstract for all the practices that have MOQC perform abstraction. This is for both electronic medical records systems and for QOPI login.
- 4800 charts were submitted for R1 2022 - more than any other previous round.
- Going forward, registration will no longer be needed - MOQCLink will not require registering each round.
- MOQC's internal abstractors access up to 16 different EMRs.
- MOQC's internal abstractors reviewed almost 13,000 patients in Round 1 2021.
- If a patient is noted to have a family history of cancer, ages of ALL relatives (1st and 2nd degree) at time of diagnosis must be documented or documented as unknown to be considered complete and meet the family history measure.

Website Scavenger Hunt

Before the Fall Regional Meetings, an online scavenger hunt was included as part of the registration email. Thank you to those who participated while also learning more about the resources we offer. Keep an eye out for a small gift coming your way.

Megan Beaudrie
Tracey Cargill-Smith
Heather West

Website Corner

On the MOQC website (www.moqc.org), you can find details on initiatives, meetings, resources, and so much more. The website is continually being improved and updated.

Under the Patients and Caregivers tab, you can learn more about our Patient and Caregiver Quality Council (POQC). You can also find the patient and caregiver resources search engine there, recently developed and launched by POQC. That search engine was featured at last June's Medical Oncology Biannual Meeting and allows patients, caregivers, and clinical staff the option of filtering resources to look for specific topics of interest within cancer care. The Patient and Caregiver tab will continue to spotlight patient and caregiver facing resources as they are developed.

Other additions to the website include a language toggle to help make the website more accessible to all Michigan residents. As a reminder, MOQC-created resources have also been translated into the four most commonly spoken languages in Michigan: Spanish, Arabic, Chinese, and Vietnamese. Those resources can be downloaded or printed free of charge on MOQC's Printed Resources page:

<https://moqc.org/resources/printed-resources/>

Abstractors! Look for new educational videos on each of MOQC's measures. Those videos will be included under the Abstraction tab and will be published shortly.

Please share these MOQC updates and resources with your teams, patients, and caregivers. You can also keep up with MOQC on Twitter and LinkedIn.

POQC Recruitment

MOQC's Patient and Caregiver Council (POQC) aims to give voice to the patients and their caregivers as it relates to improving cancer care across the state.

POQC has made a concerted effort to expand this year, and to date we have made great strides. During 2022, we have added 11 new members, expanding POQC to a total of 19 active members. Using demographic information collected by POQC's Recruitment Workgroup, efforts are being made to reach out to additional patient and caregiver populations to capture voices currently not represented.

Our hope is that each and every one of you will choose to partner with us as we look for new members. Please consider talking to all of your patients and caregivers about the work POQC does, but with a special focus on those whose voices we have designated in our flyer as not being optimally represented. We want to hear from them – the good, the bad, and the ugly of their treatment journeys. This will help us shape the recommendations of great treatment for all future patients.

POQC Recruitment Patient and Caregiver Quality Council

We are very interested in having patients and caregivers who represent a broader patient voice. There are a number of populations where we are seeking representation, which includes but is not limited to:

- Patients or caregivers who experienced a journey with these cancer types: endometrial/uterine, esophageal, head and neck/throat, Hodgkin's lymphoma, leukemia, liver, Non-Hodgkin's lymphoma, pancreatic, skin/basal cell, thyroid
- Patients with a current or diagnosis age under 30 (incl. Adolescents and Young Adults (AYAs) with Cancer)
- Caregivers under the age of 30
- People whose native language is/was not English through the cancer care experience
- People who have/had no insurance through the cancer care experience
- Patients and caregivers from medically underserved or marginalized populations
- People/Veterans who have/had TRICARE or other coverage through the military

In addition to direct patient and caregiver referrals, if your practice has a patient navigator who might be able to help identify people who have experienced cancer and would be interested in advocacy, we would love to connect.

Members of MOQC and/or POQC will reach out to patients or caregivers of interest and schedule one on one meetings to discuss participation.

Michigan Oncology Quality Consortium

Program Director: Jennifer Griggs Program Manager: Kelli DeVries
Authors: Vanessa Aron, Ashley Bowen, Kelli DeVries, Jennifer Griggs, Natalia Simon, Deborah Turner

Blue Cross
Blue Shield
of Michigan

OVERVIEW

- The Michigan Oncology Quality Consortium (MOQC) is a physician-led, voluntary collaborative of medical and gynecologic oncologists who come together to improve the quality and value of cancer care in Michigan.
- MOQC was launched in 2009 and is sponsored by the Value Partnership Program of Blue Cross Blue Shield of Michigan (BCBSM). We work with healthcare teams to identify areas in which we can improve quality or value. Since its inception, MOQC has increasingly focused on the needs of patients and caregivers, centered equity, increased its focus on value in care, and expanded its reach to all members of the healthcare teams that care for patients and their loved ones.
- Although sponsored by BCBSM, we collect data on patients regardless of their insurance status or type. Since its inception, MOQC has collected data on over 64,225 patients.
- MOQC formed the Patient & Caregiver Oncology Quality Council (POQC) in 2017 to center the voices and needs of patient, survivor, and caregiver populations. Members share stories of challenges, ideas for how to better serve patients, caregivers and loved ones, and provide the voice of patients and caregivers in focus groups, meetings or for patient-facing materials.

Our purpose is to further the success of interdisciplinary teams that improve the quality and value of cancer care

Core Values:
Trust
Integrity
Compassion
Collaboration
Growth Mindset

KEY SUCCESSSES

- Continually increasing volume of charts abstracted each round
- 9% increase in proportion of patients on hospice
- 22% increase in appropriate prescribing of antiemetics for high-risk chemotherapy
- Developed pathways for 1-day radiation treatments for patients with bleeding or bone metastases
- Formed partnership with MICMT to integrate pharmacists into oncology practices
- Formed partnership with HBOM on tobacco cessation initiatives
- Produced 5 podcasts on ovarian cancer with MDHHS
- Produced webinars for oncology practices to improve palliative care medication management
- \$5M NIH/NCI grant to identify and test for inherited susceptibility to cancer
- Ongoing growth through recruitment of new practices
- POQC includes 20 patients and/or caregivers from diverse communities, and members developed four initiatives that they lead: Financial Navigation, Patient and Caregiver Resources, Recruitment and Retention, & Black Voices on Gynecologic Cancer: Understanding Experiences
- PCOM pharmacists address multi-pharmacy needs of patients at 6 sites
- Developed an opioid prescription calculator for gynecologic oncology patients at discharge based on risk factors

CURRENT AND FUTURE QI INITIATIVES

- Antiemetics – Aim is to improve the quality of care provided to patients receiving chemotherapy throughout Michigan.
- Hospice – Medical oncology practices have partnered with hospices from across Michigan with the goal of increasing enrollment to hospice care.
- Opioid Prescription Reduction – Aim is to decrease the number of unnecessary opioid pills prescribed at discharge, based on predetermined risk factors (history of depression, anxiety, chronic opioid use, alcohol use, chronic pain, and factors related to age and admission details).
- Chemotherapy Start Date – Aim is to decrease the number of days from debulking surgery to chemotherapy start date to improve longevity expectations and quality of life for ovarian cancer patients.
- Michigan Genetic Hereditary Testing (MGHT) – Aim is to improve the quality and frequency of the family history taken by oncology providers to increase the uptake of appropriate genetic counseling and germline testing in their patients.
- Oral Oncolytics – Aim is to improve the quality of care provided to patients receiving oral oncolytic therapy throughout Michigan.
- Pharmacists Optimizing Oncology Care Excellence in Michigan (POEM) – a collaboration between MOQC and Michigan Institute for Care Management and Transformation (MICMT) developed to assist oncology practices with improving patient care and outcomes through integration of pharmacists in direct patient care.
- Primary Care Oncology Model (PCOM) – Aim is to improve the quality of care provided to patients who have cancer in addition to other comorbidities, such as diabetes, hypertension, depression, and anxiety.
- Tobacco Cessation – Aim is to help providers and patients with resources to help with tobacco cessation efforts. The initiative partners with practices to ensure proper documentation is kept to address which resources are needed for patients in the unique stages of their quit journey.
- Patient Reported Outcomes (PROs) – Aim is to expand the implementation of PROs throughout oncology sites in Michigan to improve patient outcomes. PROs to be collected include symptoms, quality of life and socioeconomic measures.

PARTICIPATION REQUIREMENTS

- Provide medical oncology and/or gynecologic oncology services
- Predominantly serve an adult population (18yrs+)
- Sign and maintain a Participation Agreement
- Submit data, as defined by MOQC
- Participate in the BCBSM Physician Group Incentive Program (GPiP)
- Participate in data abstraction quality audits
- Identify a physician champion to lead quality improvement efforts
- Identify an Administrative Lead to provide administrative and operational support
- Have an active multidisciplinary quality committee or group
- Collaborate and communicate with the MOQC Coordinating Center
- Collaborate with other participating practices through the MOQC regional structure

ACKNOWLEDGEMENTS

We would like to acknowledge the support provided by the Value Partnerships program at Blue Cross Blue Shield of Michigan.

Collaboratory

On September 22, 2022, MOQC presented a poster at the campus wide Collaboratory, hosted by the University of Michigan's Learning Health System (LHS). The LHS concept is closely related to the goals and operations of the CQIs, and the Collaboratory included symposia with distinguished speakers, workshops, and opportunities to learn about LHS-related programs.

MOQC's poster, shown here, featured an overview of MOQC, key successes, current and future QI initiatives, and participation requirements for practices to participate with MOQC. Participants of the Collaboratory were interested and inquisitive, and future participation with the LHS community could prove beneficial for possible collaborations with other QI-focused programs and projects.

Bariatric Surgery Collaborative Summit

In addition to the Collaboratory, MOQC attended the Michigan Bariatric Surgery Collaborative Summit in September. The Michigan Bariatric Surgery Collaborative is another Collaborative Quality Initiative that aims to innovate the science and practice of metabolic and bariatric surgery through comprehensive, lifelong, patient-centered obesity care. MOQC met with attendees that included representatives from POs across the state such as administrators, physicians, allied health, bariatric surgeons, BCBSM staff and more. In addition to the poster described above and information on MOQC, MOQC presented resources on body mass index, intuitive eating, general nutrition, and food security.

ACA Enrollment Reminder

MOQC would like to remind all Michiganders that Open Enrollment for 2023 health insurance runs from November 1, 2022, through January 15, 2023. Open Enrollment gives Michiganders the chance to take advantage of newly extended tax subsidies that can help make insurance more affordable. During 2022, approximately 85% of enrolled Michiganders qualified for a subsidy.

During this year's Open Enrollment period, Michiganders will have more than 300 health plans to choose from, giving them more flexibility in the coverage they need to protect their health and the health of their families.

Please find a local agent who can help: <https://localhelp.healthcare.gov/>

MOQC Team Update

We are excited to announce a new member of our team, Robin Voisine! Robin is a graduate student intern with MOQC for the next year, while she is pursuing dual Master of Public Health and Master of Social Work degrees at the University of Michigan.

Robin's previous education includes a Bachelor of Science in Packaging from Michigan State University. She worked as a Packaging Engineer for L'Oreal and Nestlé before deciding to begin graduate school. Robin's decision to pursue this career change stems from her own experience with cancer. Robin was previously diagnosed with Hodgkin Lymphoma and has been in remission for 6 years now. Robin also serves as a Patient Advisor for the Patient and Family Advisory Council at the Office of Patient Experience for University of Michigan Health.

Robin's skills include graphic design, and she is already enhancing the design of MOQC recruitment materials for future practices. She will work on a variety of projects with us over the coming months, including collaborating with Dr. Chris Friese and our project managers Shayna Weiner and Ashley Bowen to begin collecting patient reported outcomes. Please join us in welcoming Robin when you see her.
